Water Supply

- Water supply network =515 sq.km
- Consumption = 63 lpcd
- Ground water usage = 7.5 mgd .
- Households with tap water = 71.18%
- Total reservoirs = 161
- Total Frequency of water supply is 45 minutes per day.
- Total leakages =40%

Sewerage & Storm Water Management

- HH connected to drainage = 92.29%
- HH having toilet facilities = 83.58%
- Total length of sewer lines = 18 km.
- Treated sewerage water = 10%
- Length of tertiary drainage = 750 km.
- length of primary drainage is 110 km

Solid Waste Management

- Collected Solid waste per capita per day (KG)is 0.53
- Total waste generated = 750 tones.
- Total area is covered =65%.
- Door to door collection =40%.
- Collection from HH = Rs 10.
- Total iron dumpers = 500

Visakhapatnam- The Next Cape Town ?

Power

- Power supply coverage =100%
- Reduction in power outages= 95%
- Increase in renewable energy =1.2%
- Transmission losses = 3.8%

Public Transport

- Total Road length = 2015 km.
- Total vehicle density =278/1000 pop.
- Average trip length = 4.1
- Average trip rate = 0.82
- Total number of Buses = 670.
- average speed = 25.25
- Total BRT corridors = 65km.

Health Care & Education

- Total primary schools=3080
- Total teachers = 6358
- 21 girls : 100 boys in schools.
- Total Allopathic hospitals = 11
- Total beds in Allopathic hospitals =2813
- Total Primary Healthcare centers =76
- Total Ayurvedic Hospitals = 37

Municipal Service Delivery : Visakhapatnam

Visakhapatnam is also called as vijag. The city is having a population of around 17 lakhs and literacy rate 81.79%. This city is having better connectivity with every mode of transport. this city is having 2 ULB'S namely GVMC and VUDA. This city has a sex ratio of 987 .This city is also called as port city of Andhra Pradesh. There are various visiting places in this city such as Khailash Giri and Aruku Valley due to which this city is generating the economy for its state. Various industries is also located such as Bharat heavy plates and vessels, Hindustan Shipyard . This city is ranked 8th in smart city rankings. Bus is one of the major mode of public transport in this city and it is been operated by APSRTC. It is expected that there around 600 buses running throughout the city. The major road network in this city is ranging around 130 km and the total road length is about 1000 km.

Although the city Visakhapatnam is lacking in some measures, the ULB'S are having a vision that to be fulfilled by 2025. This is leading the city into best figures in terms of basic urban services. But the main concern and major drawback of this city is the ground water level which is degrading day to day this may lead to serious water crisis (as we have seen in Cape town). So government should take proper precautions and plan accordingly for the betterment of the citizens.
